PREFACE

This volume, covering the years 1943-1946, marks the second permanent cumulation of the BIBLIOGRAPHIC INDEX, and includes material that has been published in the 1943-1944 cumulative volume, the 1945 annual volume, and the quarterly numbers of 1946.

World war II naturally curtailed the number of foreign bibliographies published, with the exception of those from Latin American countries. But, during the past year this material has become increasingly more available, so that bibliographies in European publications are again included in the Index.

This volume could not have been compiled without the assistance of many collaborators, but the present editor is especially indebted to Miss Bea Joseph, former editor of the Index, who has given patient and untiring assistance whenever it was needed. Recording and classification of many bibliographies have been done with accuracy and diligence by Mr. Birger Lundell, Miss Eugenia Patterson, Mrs. D. L. Kinne, Mr. James M. Kingsley, jr., and Mr. Jack E. Brown, all of the New York Public Library, in the fields of economics, sociology, science, and technology; by Mr. Nicholas Fontana of the Brooklyn College Library and Mrs. Dorothy Douglas in the field of education at Columbia University and of theology at Union Theological Seminary; by Miss Helen Sayre of the New York Academy of Medicine; and by Miss Gladys Boughton of the Pratt Institute School of Library Science in the field of botany.

The editors and indexers of the other Wilson indexes have shown the utmost cooperation in furnishing bibliographical references appearing in their publications.

Directions for Using This Index

This index is solely a subject list. Under each subject, books and pamphlets are listed by author while periodicals are listed by title; the two types of entries are together in one alphabetical list. Complete or comprehensive bibliographies are starred and listed first under the subject. Titles used are those of the book, pamphlet, or article, but the page references are for the bibliographies only. Frequently the bibliography covers a wider field than that of the book as indicated in its title. The following sample entries illustrate the order of information given in the references.
